**COMPANY INFORMATION:** 8 Solutions, part of the ABM UK Group, is the UK Market leader in the provision of cleaning and decontamination services in the Data Centres and computer rooms of some of the UKs largest businesses.

Data Centres are the heart of many organisations handling large amounts of financial and business critical information every minute of every day. Keeping these facilities free from contaminates is a fundamental requirement in maintaining the performance of the data centre and our highly trained technicians provide that service on a regular basis.

**MAIN PURPOSE OF ROLE:** Operate as part of a team of data centre technicians to remove contamination from client sites

**KEY ACCOUNTABILITIES:** Take responsibility for completion of individually allocated work, as part of a larger team responsible for complete project delivery

**ESSENTIAL COMPETENCIES:** Reliability, able to work in a team environment, able to follow instructions and work to set processes and methodologies

**ACADEMIC REQUIREMENT:** Intermediate / Advanced level of communication in spoken English.

**DESIRABLE SKILLS:** Full, on the job, training provided
